

Product Overview

IgniteNet™'s MetroLinq™ 60 is the world's first cost-effective 60GHz PTP radio enabling high performance, interference-free connections worldwide. The MetroLinq™ 60 has an added advantage of being license-free in most markets globally, allowing ultra fast deployment and without the hassle of other frequency bands requiring a license. The MetroLinq™ 60 also includes a second 5GHz radio which can be configured as PTP (backup) to provide integrated redundancy without any additional hardware or complexity!

Key Features and Benefits

Inteference-Free & Unlicensed Band

The IgniteNet™ MetroLinq™ 60 offers unprecedented performance - combining both the benefits of unlicensed band operation with no interference!

Dual Band 60GHz & 5GHz Operation

The MetroLinq™ 60 includes a second 5GHz radio which can be configured as a backup to the 60GHz to provide automatic failover during adverse conditions. This allows links to be extended further without effecting link availability.

Powerful, Flexible Configuration

The MetroLinq™ 60 can operate either as a stand-alone device or as a coordinated, cloud-managed device, easily meeting the requirements of any installation.

Robust Weather-Resistant Design

The MetroLinq™ 60 features a hybrid metal/plastic design built to withstand the harshest environments including precipitation, hot/cold weather and high/low humidities.
